TEXAS START-UP PLAYBOOK

A BRIEF BACKGROUND

“Everything is bigger in Texas”

Although Texas is known for its massive size in both land and spirit, the state’s motto is “Friendship.” These two characteristics do a great job of defining the people of this great state who are always hungry for opportunity and are willing to help each other out to get there. Texas is the second largest State in the USA, with a population of 28.3 million and a GDP of \$1,696 billion in 2017, so it offers interesting opportunities for your company. More than 70 percent of the total population of the state lives in the aptly named Texas Triangle, which covers the region between Dallas-Fort Worth, Houston and San Antonio, and is one of eleven [megaregions in the United States](#).

Trade between the United States and the Netherlands is hugely important for both economies. The result of this trade is 825,000 jobs created in the U.S., and Texas is the strongest trade partner with the Netherlands among the 50 states. An estimated 80,000 jobs in Texas are supported by Dutch-American investment.

Historically, Silicon Valley and Seattle have been the tech destinations for the U.S., but over the last two decades the trend has shifted towards other parts of the country. Companies that once looked at a location on either American coast as an advantage are increasingly considering the logistical and cost advantages of locating in Texas.

Overall Cost of living index

Austin compared to...

Some of the advantages of Texas include:

- Low cost of living compared to other tech hubs like Boston, Chicago, New York, San Francisco and Seattle. Houston offers the best value in the U.S. for office price/sq. ft., with an average total of \$131.57.
- No personal income tax and no corporate tax.
- Mild regulations and weak unions result in lower costs to start a business in Texas. Utilities like gas, water and electricity are also relatively cheap because Texas has its own power grid, and provides its own oil and gas.
- Texas is a massive state, and because this land-richness real estate is relatively inexpensive.
- The strong economy, high quality of life, low unemployment rate, and excellent school system make Texas an attractive state to move to with your family members.

The central location of Texas is a great advantage when you want to set up your business. Startup hubs around the U.S. that are more well-known than Texas have more tax regulations and barriers to entry. These costs must be calculated into your business plan. Austin, Houston San Antonio, and Dallas are very attractive and relatively cheap alternatives to Silicon Valley, New York, Chicago or Boston. This brochure is an indispensable guide to start-ups in Texas.

A directory to all the business incubators in Texas organized by sector and region.

TEXAS
27 million

TEXAS
GDP \$1,587 bln

TEXAS
4.2% unemployment

Texas is:

- #1 for business, infrastructure, export leader
- #1 in Energy, Wind energy, Biodiesel
- #1 in Medical Center, Medical & Clinical Lab, Agri Sciences
- #2 High tech employment, FDI in IT

Houston is:

- #1 in Energy
- #1 in International Trade
- #1 in Medical Center

Austin is:

- #1 in Best for Start Ups and Freelancers
- #3 in R&D spending

1. HOUSTON

Houston is the largest city in Texas and is a main hub in the region. George Bush Intercontinental Airport is a hub for many direct flights to international destinations; the Houston Airport System boarded and deplaned almost 56 million passengers in 2016. The Port of Houston ranks first in the nation for waterborne tonnage, imports, export tonnage and breakbulk. It is strategically located at the Gulf of Mexico and connected with the hinterland via the largest U.S. rail and road infrastructure.

“If you can dream it, you can do it in Houston”

The entrepreneurial spirit runs deep in Houston.

“People here are used to drilling holes in the ground and hoping that good stuff comes out,” said Walter Ulrich, CEO of the Houston Technology Center, a 13-year-old accelerator and incubator whose graduates range from education software company Reasoning Mind to oil and gas information technology leader Merrick Systems. *“Risk-taking is part of our DNA.”*

In fact, the Kauffman Index for Entrepreneurial Activity ranked Houston among the top big cities. In the last couple of years there has been a boom in specialized organizations, such as incubators, accelerators, hackathons, demo days and meetups.

Houston has a long tradition as an energy hub; it's home to more than 5,000 energy-related firms. Not surprisingly, a good deal of start-up activity is focused on energy services and clean energy. At the same time, the wealth created by the energy business has spilled over to other areas, including education, the arts and healthcare.

[The Texas Medical Center](#) is the largest medical center in the world and a center of research and healthcare ventures focusing on everything from curing cancer to improving medical advice.

It is the 4th largest urban area in the USA. Houston has a young and diverse population. The median age is only 34.1 years and 24 percent of the residents are foreign-born.

Houston boasts more than 40 colleges, university and institutions - offering higher education options to suit all interests. The leading economic sectors in Houston are, energy and energy services, manufacturing, logistics (Port Houston) medical services (Texas Medical Center) and technology development across these fields. The Netherlands is the 5th largest trading partner of Houston.

Station Houston Events

One of Houston's tech-oriented coworking spaces, Station Houston, regularly hosts events with expert speakers that are open to the public to connect the startup and tech communities in Houston.

[Link](#)

Houston Lean Startup Circle Meetup

The Houston Lean Startup Circle meetup group was inspired by Eric Ries and Steve Blank to provide entrepreneurs with education on lean startup practices.

[Link](#)

NBSO Houston Events Calendar

Our NBSO Houston website includes an upcoming events calendar that is updated regularly.

[Link](#)

1.2 Main players

1.2.1 Coworking spaces

Coworking spaces and accelerators are valuable places for start-ups to collaborate and network while keeping overhead low. Such buildings have been booming in Houston in recent years, offering budding entrepreneurs cheap, short-term office space, a coveted downtown address, and infrastructure like IT support staff that small business couldn't afford otherwise.

One of the oldest such spaces in the city is the [Houston Technology Center](#), which opened as a business and tech incubator and accelerator in 1999 and now has four locations in the metro area. HTC plays a crucial role in connecting startup founders with funding partners – according to the nonprofit, its entrepreneurs have raised \$2.8 billion in capital and created more than 600 jobs. Perhaps the best example of Houston's new economy is [Republic Square](#), located in the former ExxonMobil Chemical campus in the Energy Corridor. Plans to redevelop the property with office towers, a hotel, luxury apartments, shops, and restaurants got scrapped during the latest oil bust. Instead, it was reborn a year ago as a 35-acre coworking space and has already attracted 70 new tenants – many of them entrepreneurial, including incubators like Pink Petro and an HTC branch. (Next they'll add dog-friendly office space and artist studios.)

[Station Houston](#) is a true hub for Houston's tech startups and entrepreneurs. Though it opened only in 2016, it has grown quickly to include 180 startups, 350 members, and 130 mentors from the Houston community. Station goes beyond coworking by hosting regular workshops to help start-ups become integrated into Houston's tech community and learn the skills they need to secure their first customers. Their network of expert mentors is also invaluable to those new to the Houston community.

Overview of coworkspaces

Wi-CO WORK

This coworking space is a completely renovated house turned shared office space, it is beautifully decorated and is full of character. The staff encourages a true coworking atmosphere with weekly happy hours and seminars.

[Link](#)

RED Labs at the University of Houston

RED Labs co working space and accelerator program gives students access to space, mentors and other resources, including unlimited coffee and ramen to launch their ideas.

[Link](#)

The Work Lodge

Located in The Woodlands and Vintage Park and it offers more than just a shared office space. Their Micro-Incubation offers Work-space, Business Development and Planning assistance, Professional Services support and the opportunity to present to their panel of Angel Investors.

[Link](#)

TMC3

This is a new facility in the heart of the Texas medical center that will bring 30,000 new jobs and \$5.2 billion to Houston. The new research facility will bring research and scientists from top facilities like Baylor College of Medicine, Texas A&M University Health Science Center, The University of Texas Health Science Center at Houston and The University of Texas MD Anderson Cancer Center. The massive new hub will boast 139,354 square meters of collaborative research space.

[Link](#)

1.2.2 Incubators & Accelerators

We highlighted 5 Incubators & Accelerators because of their exemplary way of knowledge sharing and collaboration in the (bio)-medical industry:

JLABS @ TMC (Johnson & Johnson Innovation)

The motto of JLABS is “giving early discovery every advantage for success.” JLab focuses on supporting emerging pharmaceutical, medical device, consumer and digital health companies through the tenuous time between early discovery and having the necessary resources to move a product through the path to commercialization.

1

They give companies every tangible advantage to succeed, providing access to core research facilities hosting specialized capital equipment, educational programs, operational capabilities and a community of like-minded entrepreneurs. JLABS also provides access to Johnson & Johnson Innovation deal teams expanding opportunities for venture capital funding, as well as the deal-making, therapeutic and technology area, product development and commercialization expertise of Johnson & Johnson. Therapeutic areas of focus include oncology, immunology, neuroscience, cardiovascular and metabolism, infectious diseases and vaccines.

Jlabs can offer more resources than TMCx (including dry and wet labs), but they do have a profit objective. As a startup you'll need to bring 6 months' worth of profit to the table. J-labs is the bird's eye for innovations for Johnson & Johnson.

[Link](#)

Texas Medical Center accelerator (TMCx)

The TMCx accelerator advances the development of health and medical technology companies by connecting visionary entrepreneurs to the abundant resources of the Texas Medical Center. Located in the TMC Innovation Institute, the program provides startup companies with shared workspace, a curriculum tailored to the needs of health care entrepreneurs, a variety of workshops and hands-on events and the guidance of over 120 advisors from the front lines of the industry. Companies have access to the world's largest medical center, all without membership fees or equity sharing.

2

TMC is a nonprofit organization. They offer an accelerator program (TMCx) for early stage startups. They'll provide mandatory classes on how to start a business, from a legal, medical, financial and business perspective. They also offer a Biodesign Fellowship, providing an opportunity for eight people to develop a medical novelty and test the marketability of that device. The teams are a mixture of people with a medical (clinical), business or engineering background, there are two teams divided by their focus on either digital health or biotech.

TMC Innovation also offers an incubator program (TMCx plus) for further established start-ups.

[Link](#)

NASA

NASA is an accelerator for innovative technology development and has various partner programs to encourage private innovation initiatives and application of space technology in areas related to the space industry, like biomedical, life sciences and the energy sector. For more information on this program, visit [pumpsandpipes](#).

3

[Link](#)

Midtown Innovation District

This will be a new center for startups and entrepreneurs that the city developers plan on opening in 2020. The opening of this facility is part of the city's desire to play a more important role in startups. The property is owned by Rice University, but it will be a collaboration among many participants.

[Link](#)

4

Station Houston

Station Houston will serve as an incubator at this new hub for entrepreneurship, which hopes to be the epicenter for new business in Houston since it is located in a thriving neighborhood with easy access to the city's rail system.

[Link](#)

5

There are many Incubators & Accelerators in Houston. They are listed below based on the sector. More information can be found when you click on the link.

High Tech & Energy

- [Business Technology Center \(BTC\) at Houston Business Development Inc.](#)
- [Houston Technology Center \(HTC\)](#)
- [MIT Enterprise Forum Texas](#)
- [Red House Associates](#)
- [Shell Game Changer](#)
- [Station Houston](#)
- [Technology Incubator West Houston \(TIWH\)](#)
- <https://www.houstonh2o.org/>
- <http://www.accelerateh2o.org/>

Social and environmental

- [Fruition Technoloy Lab](#)

Creative

- [Houston Arts Incubator](#)
- [TechShop](#)

University incubators

- [University incubators](#)
- [OwlSpark at Rice University](#)
- [RED Labs at the University of Houston](#)
- [Rice Alliance for Technology and Entrepreneurship](#)
- [Small Business Development Center \(SBDC\) at the University of Houston](#)
- [3 Day Startup \(3DS\)](#)

(Bio)-Medical

- [BioHouston](#)
- [Biotechnology Commercialization Center \(BCC\) at the University of Texas Health Science Center at Houston](#)
- [Fannin Innovation Studios](#)
- [NextHIT \(Houston Health Ventures\)](#)
- [NSBRI Industry Forum \(National Space Biomedical Research Institute\)](#)

Port Houston

Port Houston has a special program to support local small businesses, through its [Small Business Development Program](#) and the [Local Preference Procurement Program](#). By registering with this program, small businesses are enabled and encouraged to bid for contracts in the Port.

International trade development and trade financing programs are further available via for example the EXIM Bank, the Small Business Support Office's International Trade Agencies and the Texas District Export Councils, amongst others. Partnering with other US startups can be a great way to access these programs.

1.2.3 Crowdfunding

For both investors and entrepreneurs looking for investors, a good online platform 'to empower business owners and everyday people to invest in one another'

[Link](#)

1.2.4 Venture capital & Angel investors

Houston Angel Network

The largest Angel Network in the state of Texas

[Link](#)

Mercury Fund

Mercury Fund focuses solely on seed and early-stage ventures.

[Link](#)

1.3 Online resources

Houston Start-ups List

A very convenient map of the local innovation Industry in Houston. It provides a list of the newest startups based in Houston, relevant events, coworking spaces and job advertisements.

[Link](#)

Startup Houston

An online platform the get in touch with other start-ups and the possibility to discuss topics on a live chat.

[Link](#)

Angels Houston

A search engine to find start-ups, start-up jobs, investors, incubators and many more related items.

[Link](#)

Visit Houston-Texas

A general and complete guide with useful information on Houston. From Fact and Figures, a description of the industries to events and things to do in Houston.

[Link](#)

1.4 Beyond business

The [Greater Houston Partnership \(GHP\)](#) represents Houston's business interests and is an influential (membership-based) business network. The GHP is a great source of information on local trends and the economy when considering opening shop in the greater Houston area. The GHP partnered with Accenture to create a strategic plan for Houston to be an innovation city at a world-class level.

Houston is at the heart of the Dutch business support system in Texas. [The Netherland-America Foundation Houston Chapter \(NAF\)](#), the [Netherlands Business Support Office](#) and one Honorary Consul are all based in Houston.

2. AUSTIN

“Keep Austin weird”

Austin has a vibrant, creative and entrepreneurial spirit but has kept a smaller town atmosphere. The University of Texas Campus, which is in the middle of the city, keeps the heart of the city youthful and wanting more.

Known as the land of the perpetual boom, it is a growth corridor that is expanding and attracting residents and jobs with impressive numbers, leaving the rest of the big metro areas in the United States in the dust. Austin ranks best in the country for freelancers (Nerdwallet), best for start-ups (Kaufmann index), best American city for LGBT seniors (SeniorAdvice) and is expected to double its population by 2040.

The Austin-Round Rock metropolitan area is the third largest in Texas. Austin’s population has a high concentration of well-educated millennials. The median age is 33.7. The city’s population has grown by 37.7 percent in the last decade.

Since 2000, employment in the Austin area has expanded by 52.3 percent. Austin’s job growth has been roughly three times that of New York, more than four times that of San Francisco, five times of Los Angeles and 10 times of Chicago. For two years in a row, Austin has taken the number one spot in the United States on the influential Kauffman start-up index with the most start-ups per capita, unseating Silicon Valley as the traditional start-up capital of the US. Following this data, roughly 555 out of every 100,000 adults in the Austin region became entrepreneurs in a given month during the past five years, on average.

Furthermore, nearly eight out of 10 new entrepreneurs in the Austin area were employed at the time they created their start-ups. Lastly, Austin claims about 180 start-up businesses – defined as businesses less than a year old that employ at least one persons besides the owner – per 100,000 residents.

2.2 Main players

2.2.1 Coworking spaces

WeWork

WeWork has two locations in Austin. There are many common areas where you can find like-minded entrepreneurs. Both buildings have lounge areas and easy access to great restaurants and the city's unparalleled music scene. WeWork has offices worldwide, including in Houston and Amsterdam, and your membership allows you entry into any of their spaces.

[Link](#)

Createscape

Createscape is a coworking office space in the heart of Austin with an aesthetic design and an open-workplace environment for freelancers, start-ups, remote teams, non-profits, and small business entrepreneurs to work, collaborate and create.

[Link](#)

Overview

An overview and rating of all the available coworking spaces in Austin are at Yelp .

[Link](#)

2.2.2 Incubators & Accelerators

Most of the incubators and accelerators listed below also offer coworking spaces.

Capital Factory

Located right in the middle of downtown Austin, Capital Factory is the ultimate place for entrepreneurs to learn, work, and accelerate their companies. The 16th floor is an open floor plan with coworking, dedicated desks, meeting rooms, event space, a classroom and a fantastic break room. The 5th floor has private offices, dedicated desks, a game room, and a video recording studio.

Capital Factory offers a Device Lab that gives you access to a plethora of tablets, phones, and other devices for QA, research, development, expansion, and customer support. Every day there are angel investors and venture capitalist at Capital Factory. You can become part of a mentorship program. In this program a CEO (former start-up entrepreneur) will give you all the guidance you need.

Capital Factory introduces you to a great network of incubators, accelerators and venture capitalist.

1

[Link](#)

ATI- Clean Energy Incubator

Another well-known incubator is ATI-Clean Energy incubator, which is the longest established incubator in the US since 2001 and they are the start-up incubator of the University of Texas at Austin as part of the [IC2 Institute for the University of Texas at Austin](#).

They support university entrepreneurship and start-ups at the early stage of pre-formation funding (research grants etc.). They provide distinctive support for competitive grants, including ERC. Selected by State, Federal government as “best practices” and have raised almost \$837 million in investor capital since 2007. The ATI portfolio has provided a 3X return to investors.

ATI has a big economic impact, they have created for \$1 billion in economic value, which is more than 6,500 jobs for Austin. Five teams of the University of Texas in Austin research use ATI as a “laboratory.” ATI also teaches courses in five UT-Austin schools/colleges.

2

[Link](#)

3

Galvanize

Their campus serves as a home base to start-ups and established companies building tech-enabled innovations and has all the amenities of a coworking space, plus learning opportunities, resources, and access to the network a growing start-up needs. Galvanize Ventures offers Venture Capital. They are always looking for great early stage investments in the members and the larger community.

[Link](#)

4

Mass Challenge

Mass challenge currently helps 84 companies from 5 continents, 11 countries, 12 states, and the five major Texas cities. Mass Challenge accepts start-ups from any industry from all over the Companies that apply should have raised less than \$500 thousand in equity-based funding and have less than \$1 million in sales for the previous 12 months in which they apply.

UP Austin

UP supports new ventures, provides resources for entrepreneurs, and connects the community.

[Link](#)

Pecan street

Headquartered at The University of Texas at Austin, Pecan Street Inc. is a research and development organization focused on developing and testing advanced technology, business model and customer behavior surrounding advanced energy management systems.

[Link](#)

2.4 Beyond business

The [Netherlands Business Support Office](#) Texas supports Dutch companies looking for business opportunities in Austin. Also, the [Greater Austin Chamber of Commerce](#) helps (new) businesses looking for opportunities in Austin. The City of Austin promotes (small) business development and has several programs to support start-ups, like [BizAid](#), BizOpen, Entrepreneur Center of Austin, Locally Austin etc. and various funding programs.

The [Austin Independent Business Alliance](#) is an organization of independent, locally owned firms in Austin and is composed of over 300 member businesses, promoting small businesses in Austin. It helps communities to launch and successfully operate “buy local” campaigns; facilitate group purchasing and marketing among local businesses, and other programs to support community enterprise.

3. SAN ANTONIO

Ranked as the number one city for economic growth potential by Business Facilities and number third among America's Secretly Cool Cities by the Huffington Post, San Antonio continues to be a shining star in Texas. Located in south-central Texas, San Antonio is the 7th largest city in the United States and has a population of over 2 million. The 15 colleges and universities in the area educate 160,000 students, providing a steady supply of skilled talent to the City's workforce of 1.2 million.

From the 350 small companies getting their start at the local tech incubator (Geekdom) to larger operations like Maruchan and Toyota, businesses of all sizes thrive here. San Antonio provides a business-friendly environment to a broad range of industries including aerospace (Boeing, Lockheed Martin), healthcare (Humana, United Healthcare), bioscience (BD- Becton, Dickinson and Company, Medtronic), information technology (Rackspace), cybersecurity (root9B, Digital Defense), new energy (Mission Solar Energy, KACO New Energy), and advanced manufacturing (Cytocentrics, Indo-MIM).

Businesses are attracted to San Antonio's low-cost of doing business, skilled workforce, central North American location with proximity to Mexico, and high quality of life. In San Antonio, you'll find a business community and a local government that provides business environment that values growth and an eagerness to assist new international businesses succeed here.

For more information on San Antonio and to explore target industries in six additional languages, visit the international landing page [TxOpportunity.com](https://www.txopportunity.com).

3.1 Events

San Antonio Start-up Week

A five-day event organized by volunteers to bolster the city's start-ups. The event has educational panels, workshops and city-building events.

[Link](#)

TechBloc

TechBloc wants to secure San Antonio's future as a city rife with great companies and a thriving social scene. They organize many events throughout the year including panel discussions, job fairs and networking receptions.

[Link](#)

Geekdom Events Calendar

Geekdom is a coworking space for start-ups that also serves as an event space for meetups and other community events. You can find those events on their online calendar.

[Link](#)

Henry B. Gonzales Convention Center Calendar

The Gonzales Convention Center is one of the most important spaces for conventions and tradeshow. Their events are very general, and they update their calendar regularly.

[Link](#)

3.2 Main players

3.2.1 Coworking spaces

Geekdom

One of the main players in the start-up scene in San Antonio is Geekdom. The organization provides a collaborative workspace where community entrepreneurs gather to give insight, provide mentorship, and lend support to one another.

[Link](#)

Cubes at the Quonset

Quonset is just a block away from “The Pearl,” a former brewer turned shopping center with restaurants and apartments along the bank of the River Walk. Work spaces range from 250 to 800 square feet, and in total accommodate up to forty members.

[Link](#)

EPI Center

Currently, EPI Center is transforming an historic power plant into a world-class center that will serve as a cradle for invention and a catalyst for clean energy innovation and technological advancement.

EPIcenter is a dynamic place where visionary entrepreneurs, technologists and communities come together to create a brighter energy future. Leaders from around the world will come here to research, generate and promote new ideas surrounding new energy, and to engage citizens of all ages in discussions about energy transformation. EPIcenter is San Antonio’s gift to the new energy industry worldwide, as it is a local hub with global implications for the new energy economy.

Venture X

Venture X is in the North of San Antonio just 15 minutes from the airport. The space welcomes companies at every stage of their development, so you’ll be interacting with a broad range of entrepreneurs. The spaces have a modern, loft design with exposed ceilings, and outdoor patio terrace, and floor-to-ceiling windows. The space also offers a centralized café lounge, high-speed internet, office supplies and equipment and meeting rooms.

The coworking space also hosts weekly events for its members. It already has many locations throughout Texas and plans on expanding with multiple locations in Houston and Dallas.

3.2.2 Incubators & Accelerators

AccelerateH2O

AccelerateH2O discovers, invests in, and promotes new and existing technologies that have potential to fill demands and needs in Texas' \$9 billion water technology market by addressing critical water issues, barriers, and unique opportunities.

AccelerateH2O is a non-profit organization, born out of the Texas Research & Technology Foundation in 2014, that provides open research and resources for water technology start-ups. It plans to provide a database of technical papers and patents from Texas' academic institutions and research organizations.

Still in its early stage, the accelerator received a \$500,000 grant from the Texas Research and Technology Foundation to initiate its first program focused on identifying critical water issues within the state. The organization will focus on investing and promoting new and existing technologies including direct water reuse, concentration management, and zero liquid discharge for difficult-to-treat wastewaters.

4. DALLAS - FORT WORTH

Dallas has one of the strongest economies in the country. Its proximity to Fort Worth makes it a booming metroplex, and the cities are often named together. The Dallas/Fort Worth International Airport is one of the largest and busiest airports in the world; the region has become a major inland port in addition to its successful economy.

Out of the four major cities in Texas, Dallas might be the most typically Texan. It is home to the [State Fair of Texas](#), which lasts for 24 days celebrating everything about the Lone Star State while promoting agriculture and education.

With professional teams in American Football, Basketball, Baseball, Soccer and Hockey, the city is also a great destination for sports. Additionally, Dallas has made a name for itself in the fine arts world with the Dallas Museum of Art and many galleries throughout town.

Although they are often paired together as the same city, Fort Worth has its own identity and business culture as well. And the proximity to Dallas does make the metroplex a great way to access millions of hard-working Texans. Fort Worth has four great universities and is home to some of the nation's top companies, such as Pier One Imports and Acme Brick.

There are 22 Fortune 500 companies in Dallas and the surrounding areas including Exxon Mobil, AT&T, American Airlines Group, and Energy Transfer, which are all in the top 100.
